Bed Covers

RETRAX™

The Last Bed Cover You'll Buy

Meeting Your Leisure, Professional & Upscale Needs

- ✓ **Warranty** – Best on retractable covers in the market
- ✓ **Secure** – Latches and Key lockable in any position
- ✓ **Durable** – Retracts without wear and tear in unique spiral track canister that prevents cover from coming in contact with itself
- ✓ **Stylish** – Unique low profile design
- ✓ **Flexible** – Unlimited hauling flexibility

Available with Realtree® Camo

- ✓ **Precision** – Sealed-for-life bearings for smooth, one-handed operation

2014 RETRAX APPLICATIONS

Ideal for Automotive Family Groups

STYLE*	RETRAX ONE	RETRAX CAMO	RETRAX PRO	POWERTRAX ONE	POWERTRAX CAMO	POWERTRAX PRO
Ford / Lincoln	19	8	17	8	8	8
Chevy / GMC	24	12	22	12	12	12
Dodge	15	5	15	5	5	5
Toyota	14	7	12	7	7	7

* 52 Additional applications for Nissan, Honda, Mitsubishi, Mazda, Isuzu, and Suzuki

RETRAX ONE

Tempered aluminum support beams embedded into the polycarbonate sheet add strength to support heavy snow loads and ensure quiet, stable travel at any speed. Ideal for 5th wheels.

RETRAX PRO

Industrial strength aluminum provides support to distributed loads of more than 500 pounds! Ideal investment for heavy duty uses.

POWERTRAX ONE

If luxury is the name of your game, you'll appreciate the PowertraxONE - opens and closes with the touch of a button from a remote keyfob.

POWERTRAX PRO

This **AWARD WINNING** retractable bed cover features all the same great benefits of the RetraxPRO, but allows for hands-off operation via a wireless remote control.

Suspension Enhancement Firestone Ride-Rite

Firestone

World's Number 1
Air Spring.

FIRESTONE INDUSTRIAL PRODUCTS COMPANY

Benefits of Air Springs

- Reduce bottoming out
- Increase vehicle stability
- Reduce sway
- Absorb road shock
- Reduce suspension fatigue

Ride-Rite™ Air Helper Springs

- Provides better ride support through the use of air pressure
- Air can be adjusted for varying loads
- Easy Install - Most kits are no drill

Work-Rite™ Load Assist Springs

- Injection-molded spring
- Adjustable for individual loads using spacers instead of air
- Maintenance free

Level-Rite™ Air Helper Springs

- Air Spring paired with Bilstein monotube shock absorber
- Reversible sleeve air spring
- Perfect leveling solution for front end trucks and SUVs that have a snow plow, haul a slide in camper or have heavy grill guards or bumpers

Coil-Rite™ Air Helper Springs

- Air Helper springs made for vehicles with coil spring suspensions
- Air can be adjusted for varying loads

Suspension Enhancement Firestone Ride-Rite

R4Tech™

R4Tech is a proprietary, hybrid air-over-leaf suspension system, designed and manufactured by SANLUIS Rassini

A complete R4Tech kit includes leaf springs, trailing links with J-springs, air springs, load adaptive shocks, air compressor and tank, and all necessary hardware.

Ask your sales representative for a current Vehicle Fit Guide, or visit wholesaletrailer.com

Big rig trucks use air suspension for a reason. Airide™ suspensions ride better than steel spring suspensions, reduce the wear and tear on your equipment and protect both the driver and cargo, regardless of the load.

The R4Tech suspension is a proprietary (patent pending), hybrid air-over-leaf suspension that provides the ride quality of a full-air suspension, the axle control of a leaf spring and the ease of installation of a standard leaf spring and Ride-Rite kit.

The foundation R4Tech suspension is designed and manufactured by SANLUIS Rassini, the preeminent supplier of leaf springs to the North American light truck industry. When combined with Firestone Airide™ air springs and Ride-Rite™ air accessories, the result is R4Tech, a suspension kit that is unmatched in terms of durability, reliability and ride quality.

Each application is carefully designed and tuned to improve the ride quality and handling performance of the factory vehicle.

Ride-Rite LS

Ride-Rite LS is Firestone's line of load adaptive shocks and is a key component of the R4Tech premium suspension system and is an ideal upgrade to Ride-Rite air helper springs. Ride-Rite LS is a tri-tube mono-flow shock absorber designed to deliver superior performance under a full range of load and temperature conditions. The damping level is automatically controlled by the air pressure inside the spring, so there is no need to crawl under the truck to adjust the shocks. This easy-to-install product comes complete with air line and "T" fittings.

Suspension Enhancement Firestone Ride-Rite

Ride-Rite™ Air Helper Springs

Ride-Rite kits improve the handling of most light trucks, motor-homes, RVs, SUVs and vans.

Air springs, brackets, hardware, air line, and separate valves for manual inflation are all included for a straightforward installation.

Ask your sales representative for a current Vehicle Fit Guide, or visit wholesaletrailer.com

Firestone's most popular and comprehensive air helper spring line, Ride-Rite kits can be installed on most light trucks, motor-homes, RVs, SUVs and vans. Each application is specifically designed to maximize the vehicle's safe load-carrying capacity, stability, ride quality and brake effectiveness.

Firestone Ride-Rite air helper springs provide load support through the use of air pressure that can be adjusted for changing loads. They enhance the ride by reducing inter-leaf friction.

The system features individual inflation valves that allow for separate side-to-side or front-to-rear adjustment, which helps keep the vehicle level when carrying off-center loads and maintains ride quality under differing load conditions.

Most Ride-Rite kits are no-drill systems, designed to use the vehicle's factory holes and mount between its frame and suspension. All the components are included in the kit for an easy installation that typically takes 1 to 2 hours. Kits come with a two-year limited warranty.

Like Ride-Rite air helper springs, the Sport-Rite air springs improve the ride and handling. While Ride-Rite kits include convoluted style air springs, Sport-Rite kits include innovative tapered sleeve air springs, which are more conducive for specific applications. Sport-Rite kits support up to 3,000 lbs. per set (not to exceed vehicle's GVWR) and should be maintained between 10-100 psi.

Work-Rite™ Load Assist Springs

The progressive load-deflection characteristics of the Work-Rite kit will smooth your ride when your vehicle is fully loaded, and won't compromise your ride when it's not.

These load assist springs are injection-molded, and are made of microcellular urethane. They do not use air like the Ride-Rite family of springs so there is no air pressure to monitor. They are adjustable for individual loading scenarios using spacers provided in each kit.

There are eight separate spring-geometry and stiffness combinations for several applications for light duty trucks, vans and SUVs. Most Work-Rite kits are a no-drill design, which means they use the existing holes in the frame for installation and require only simple hand tools.

The Work-Rite load assist springs are maintenance-free with a limited lifetime spring warranty and provide a more comfortable, safer ride for you and your cargo.

Work-Rite kits contain load assist springs, brackets, and hardware for a this quick installation. Spacers may also be used.

Suspension Enhancement Firestone Ride-Rite

Coil-Rite™ Air Helper Springs

If you're looking for a smoother ride for your vehicle that has a coil spring suspension, Firestone Coil-Rite air helper springs are what you need. Designed to fit inside existing coil springs to create a variable spring rate, Coil-Rite will level your vehicle and assist with more effective braking and handling, even under heavy loading and adverse road conditions.

Designed for cars, minivans, vans, light trucks, RVs and SUVs that have coil springs.

Coil-Rite enables you to control the air pressure in the air helper springs so you can make adjustments for varying loads and road conditions. Spring performance can be altered as easily as inflating a tire.

Firestone Coil-Rite air helper springs are made of durable, elastic polyurethane, providing years of comfort and stability to your vehicle. The air springs will support 500-1000 lbs. per set (not to exceed vehicle's GVWR). Coil-Rite Air Helper Springs are designed to work in temperatures between 180°F (82°C) and -40°F (-40°C).

Air helper springs, hardware, air line and separate valves for manual inflation are all included in the Coil-Rite kit.

Level-Rite™ Air Helper Springs

Certain factory suspension configurations do not allow the fitment of a stand-alone air spring. In these instances, it is necessary to pair the air spring with the shock absorber to achieve meaningful load capability while maintaining a hassle-free installation. For these applications, Firestone has designed a fully-protected, reversible sleeve air spring and paired it with a high-performance Bilstein monotube shock absorber for perfectly matched performance characteristics over the entire operation range.

Firestone's Level-Rite product provides the perfect leveling solution for the front end of late model Dodge, Chevrolet and GMC trucks and SUVs used for snow-plowing, hauling slide-in-campers or that have large, heavy grille guards.

Level-Rite products combine reversible sleeve air springs with high-performance shock absorbers.

Suspension Enhancement Firestone Ride-Rite

Dodge Ram Air Conversion System

If you own a Dodge Ram 1500 (2009-2013) with rear coil spring suspension, you may have noticed that when your truck is fully loaded, the bed of your vehicle sags considerably more than it would with a leaf spring suspension.

Firestone's solution to this problem is the Dodge Ram Air Conversion System. It is designed to replace the factory coil spring with an air spring, converting the rear suspension to an Airide™ suspension. The full air conversion provides a higher leveling capacity – up to the Gross Vehicle Weight Rating (GVWR) of the vehicle – than traditional systems, while smoothing the vehicle's ride.

Our Dodge Ram Air Conversion System keeps the vehicle level under all load conditions. The conversion maintains all the factory hardware and suspension geometry to seamlessly integrate the air springs with the factory coil spring retainers.

Easily installed with simple hand tools, the system improves steering and vehicle control while reducing bottoming out when adding a load. The Dodge Ram Air Conversion System allows for effortless loading and trailer attachment, thanks to the capability for a 6-inch kneel at the hitch by "exhausting" air from the springs. The kneeling feature is controlled by an in-cab switch; no calibration is required. The Firestone Dodge Ram Air Conversion System comes with a limited lifetime warranty on springs.

Ask your sales representative for a current
Vehicle Fit Guide, or visit
wholesaletrailer.com

The 2009-2013 Dodge Ram Air Conversion System (Part #2518) contains Airide™ springs, a Heavy Duty air compressor and 3 gallon tank, height sensors, kneel switch and hardware.

Our Dodge Ram Air Conversion System keeps the vehicle level under all load conditions.

Air Springs

Firestone continues to raise the bar on high pressure and high quality air springs with our **RED LABEL™** edition. The air spring operates up to 150 PSI and has a test pressure of 400 PSI. *The Red Label parts are not intended to supplement the standard air springs in the Ride-Rite kits. The Red Label parts are intended for use on custom applications only.*

Suspension Enhancement Firestone Ride-Rite

Lifted & Lowered Applications

Lift spacers can be used with most Ride-Rite™ air helper spring kits - NOT Coil-Rite™ or Sport-Rite™ kits. In order to ensure proper spacer usage, determine the distance between the upper and lower brackets of your air helper spring kit, and whether the kit mounts on the leaf spring or the axle. The spacer needs to be the same length as the amount of lift applied to the axle on which the air helper spring is being installed.

- Axle Mount - Lower bracket attaches to the axle
- Leaf Mount - Lower bracket attaches to the leaf stack

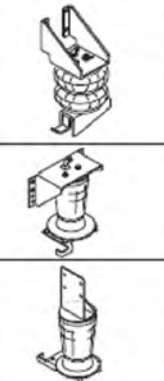

The lifted and lowered vehicle applications come complete with the necessary brackets, air springs, fittings and inflation valves for manual inflation.

Lift Spacers		Distance Between Brackets	Block Size	Axle Mount No.	Leaf Mount No.

Extension Hose: Part No. 9006
The 25 ft. Extension Inflation Hose is included in the following popular Air Command Kits:

- 2047 Air Command
- 2540 Remote Air Command
- 2541 Heavy Duty Remote Air Command
- 2266 Xtra Air Command-Single
- 2168 Xtra Air Command-Dual
- 2546 Xtra Remote Air Command
- 2547 Xtreme Remote Air Command

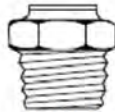

Helpful Tools

The scale shown below may be used to assist in identifying the correct NPT (National Standard Taper Pipe Thread) fitting. Thread sealant is applied to the tapered threads. If the fitting is removed, use Teflon tape during reinstallation to prevent air leaks. If you need to replace a fitting, please see page 54 for replacement parts or call 800-888-0650.

Air Accessory Mounting Kits

Firestone's Air Accessory Mounting Kits allow the compressor only, tank only or entire air accessory system to be pre-assembled table top, before the vehicle is on the lift. The plate with the assembled accessory system can easily be attached to the frame, without drilling using bail clamps.

2496	2529

Air Accessory Systems

Air-Rite™ Air Control Systems

Firestone has expanded the offering of Air-Rite Air Control Systems, which provides an instant air source for air suspension products. Adjust the ride for various load and road conditions with a flip of a switch or even a click on a remote. Individual air accessory components are also available, including compressors, air tanks and mounting solutions, providing a wide variety of air control assist solutions.

Choosing among the Air Command products has now become easier. To select an Air Command Kit from the table below, consider the level of air source and the style of gauge that best fits the application.

MODEL	Equal Pressure	Side-To-Side Leveling	Side-To-Side Leveling	Equal Pressure	Side-To-Side Leveling

Air Accessory Systems

Level Command System™
Level command uses a height control valve mounted between the chassis and suspension. It is designed to keep the air helper springs at a controlled height.

2186 Shown:

Remote Fill Stations
The Remote Fill Stations offer an on-board air source for inflating air springs, tires and other pneumatic components. This includes a compressor, an air tank and a 25 ft. extension hose.

Android App Part No. 2556

The Firestone Ride-Rite Air Command™ Android app allows users to remotely adjust the amount of air in Firestone's air helper springs by conveniently turning a smart phone into the controller. The new app works with the Firestone Android Air Command Kit by providing an instant air source while delivering convenient adjustability to the air helper springs with the push of a button. The kit includes a Light Duty air compressor, Electronic Control Unit (ECU) and instructions for downloading the Firestone Ride-Rite Air Command™ Android app from Google Play.

Key Fob Part No. 2555

The Compact Remote Air Command System consists of a key fob controller, Electronic Control Unit (ECU) and a Light Duty air compressor. The key fob controller turns the Light Duty compressor on (up to 100 psi with a 9% duty cycle) to inflate the air helper springs and opens the exhaust valve to release air. This kit is easy to install, convenient and puts the power of air at your fingertips.

TECH TIP

- Single control panels inflate and deflate one pair of air springs.
- Dual control panels inflate and deflate two individual air springs or two pairs
- Pneumatic control panels are used in systems that utilize tanks.
- Electric control panels do NOT require a tank.

COMPRESSORS

Firestone's air compressors are included in most Air Command™ systems and may also be purchased separately. All Firestone compressors are direct drive compressors (no oil or belts), so the compressors can be mounted in any position. Compressors should be mounted in a clean air location.

HELLWIG AIR™

Hellwig  **air**
PRODUCTS.COM SUSPENSION

Air Suspension

Better handling and control under heavily loaded conditions

Maximize safe load carrying capacity, stability and ride quality

Superior ride quality of this unit softens typical loaded ride conditions by transferring load from the vehicles leaf spring to the Hellwig Air Spring

Simple installation for years of heavy duty control

Each kit is designed to maximize safe load carrying capacity

Longer stroke (less pressure for softer ride)

Complete with double convoluted heavy duty air springs

Lifetime warranty on Hellwig bracketery

*Heavy duty powder coated brackets

Suspension Enhancement SuperSpring Application List

SuperSprings™

Locate the **SuperSprings** part number for your vehicle in the chart below or from the "Find your Spring" pull down menu on the home page.

Where a Mounting Kit is required, remember to order part number MTKT separately.

If your vehicle has rear leaf springs but is not listed on this site, please contact our [tech support](#) line for additional applications.

SuperSprings enhance load carrying capacity, handling and towing.
Do not load any vehicle beyond the manufacturer's gross vehicle weight rating.

Suspension Enhancement Timbren Application List

- Reduce Suspension Sag
- Improve Roll Stability
- Cushion Road Shock
- Improve Handling
- Easy To Install
- Maintenance Free
- Lifetime Warranty

Timbren kits are available for both front and rear suspensions.

Timbren SES - Suspension Enhancement Systems provide protection against overloading, road shock, bottoming out, sway and broken springs. Front axle kits prevent front end nose diving. Together, these features provide a smooth, level ride, even with heavy loads.

Today's on and off road vehicles are well engineered with fine suspensions, built to do the job for which they were designed. However, many vehicles are overloaded, or drivers find themselves on bad roads or operating under unusual conditions where the suspension needs help. Timbren's Aeon Hollow Rubber Springs were designed to meet these needs. Timbren SES kits help to eliminate sway and bottoming out, get rid of axle hop, and give an even, level, stable ride, both while loaded and unloaded. Timbren SES kits are simple to install and require no alteration to your present suspension.

Most Timbren kits are simple to install and do not require drilling.

We've provided access to the installation instructions for every Timbren kit we offer. Simply find your vehicle in our application guide above, and you will be shown a link that will take you to the instructions. The typical Timbren installation goes something like this:

- Raise the vehicle allowing the axle to hang free
- Remove the wheels for greater access to the suspension
- Remove the OEM bump stop
- Assemble the Aeon rubber springs and brackets as shown on the installation instruction sheet
- Reinstall the wheels and lower the vehicle
- Check for correct positioning and clearances

One of the great benefits of Timbren helper springs is that there is no maintenance to perform once installed. Timbren helper springs are designed to last the life of your vehicle.

TIE-DOWN ASSEMBLY USAGE CHART:

This chart is provided as a guide to meet the basic minimum current in service requirements of the FMCSA¹ and the DOT² published Sept 27, 2002. The following table lists the minimum number of chain assemblies required to secure a load per DOT & CVSA³. *This chart is only to be used as a reference.

*Many factors affect the proper method of cargo securement including the length and type of the cargo to be secured. Refer to the most recent revision of The Dept. of Transportation (DOT) Title 49 regulations for more complete requirements regarding the proper methods and number of tie-downs required.

SCC Chain Grade	Size (Inches)	WLL	Net weight of cargo to be secured in Lbs.							
			20,000	25,000	30,000	35,000	40,000	45,000	50,000	
Alloy Grade 80 (S8, SX8, T-80)	5/16	4,500	3	3	4	4	5	5	6	
	3/8	7,100	2	2	3	3	3	4	4	
	1/2	12,000	1	2	2	2	2	2	3	
Transport Grade 70 (S7, SX7, S-70)	1/4	3,150	4	4	5	6	7	8	8	
	5/16	4,700	3	3	4	4	5	5	6	
	3/8	6,600	2	2	3	3	4	4	4	
	1/2	11,300	1	2	2	2	2	2	3	
High Test Grade 43 (S4, SX4, S-43)	1/4	2,600	4	5	6	7	8	9	10	
	5/16	3,900	3	4	4	5	6	6	7	
	3/8	5,400	2	3	3	4	4	5	5	
	1/2	9,200	2	2	2	2	3	3	3	
Proof Coil Grade 30 (S3 SX3, S-30)	1/4	1,300	Due to the low working load limits of S-3 chain, SCC does not recommend using Proof Coil Chain for Transport tie-down or cargo securement.							
	5/16	1,900								
	3/8	2,650								
	1/2	4,500								

¹FMCSA: Federal Motor Carrier Safety Admin

²DOT: Department of Transportation

³CVSA: The Commercial Vehicle Safety Alliance

This chart is based on each tie-down secured to a trailer anchor point, traversing across or through the load and then secured to another anchor point on the trailer.

If used by securing the tie-down to the trailer anchor point and attaching it directly to an article of cargo (IE: a vehicle), the quantity of tie-downs required shall be 2 times the quantity listed in the chart above.

WARNING: Never exceed Working Load Limit as stated in catalog and on strap tags to determine the number of tie-down assemblies and/or hardware required for safe operation per federal D.O.T. FMCSA 49 CFR Parts 392-393, CCMTA and the C.V.S.A inspection criteria. Remember, all assemblies are only as strong as their weakest point, including the point of attachment.

WARNING: Never exceed Working Load Limit. Load binding systems store energy which can release suddenly, causing serious injury. Stay clear of handle, bars and other binding equipment as it could release without warning and with extreme force. Remember, assemblies are only as strong as their weakest point, including the point of attachment. **▲ These products are NOT designed or approved for overhead lifting.**

Trailer Brackets

Panel Bracket Assemblies

Brackets are one piece, heavy duty hot dip galvanized 11 gauge steel, specifically designed to support keel rollers. Available with amber or black rollers. Assemblies include keel roller, shaft and pal nuts.

Part #	Color	Roller Size	Width Between Slots	Bracket Width
86279	Amber	5"	3"	5-3/8"
86414	Black	5"	3"	5-3/8"
86280	Amber	8"	6"	8-3/8"
86415	Black	8"	6"	8-3/8"
86281	Amber	10"	8"	10-3/8"
86416	Black	10"	8"	10-3/8"
86282	Amber	12"	10"	12-3/8"
86417	Black	12"	10"	12-3/8"

Panel Brackets

Brackets are one piece, heavy duty hot dip galvanized 11 gauge steel, specifically designed to support keel rollers. Slots accept 7/16" or 1/2" diameter bolts and provide vertical roller adjustment. Roller shaft diameter can be 1/2" or 5/8".

Part #	Roller Size	Width Between Slots	Bracket Width
86150	4"	2"	4-3/8"
86151	5"	3"	5-3/8"
86152	8"	6"	8-3/8"
86155	10"	8"	10-3/8"
86153	12"	10"	12-3/8"

Split Panel Brackets

Sold in pairs (right and left) to accommodate any size roller length. Slot allows vertical adjustment for stabilizing boat on trailer. Slots accept 7/16" or 1/2" bolts. Use 1/2" or 5/8" roller shaft.

2 per pack Part #81235
Bulk Part #86140

Keel Roller Bracket

Adjustable offset brackets mount on tongue for keel support. Assembled version comes complete with 4" rubber roller (for 2" wide tongue) and hardware as shown. Brackets are available in pairs or bulk.

Description	Part #

12"	1-1/16"	81220	81221

Bunk Brackets

Heavy 11 gauge hot dip galvanized steel brackets mount 2" bunks on edge. Slotted for vertical adjustment to standard or deep-V hulls.

Bracket Length	Slot Length	2-Pack Part #	Bulk Part #
9-1/2"	6"	81225	86125
12-5/8"	9-1/8"	81230	86126
8"	4-1/2"		86149

Bunk Boards

Heavy-duty replacement bunk boards come in three sizes, 3', 4', and 5' lengths. Black marine grade carpet provides a smooth surface for your boat to easily slide on or off. Sold in pairs.

Description	Part #
3'	86127
4'	86128
5'	86129

Bunk Board Carpet

All weather carpet is designed to replace worn and frayed bunks on your trailer. The marine grade carpet will not rot or mildew. Each roll measures 11" x 12'.

Boat Anchors

Available by special order only.

Hooker ANCHORS

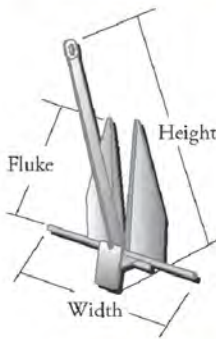

Hooker Quik-Set

This innovative anchor replaces the Economy anchor line with a fresh design and increased performance. The Hooker Quik-Set has 50% more holding power and the appearance of an anchor costing much more. The Hooker Quik-Set design with the "Slip Lock" shank insures a proper set regardless of which way the anchor lands. A slip design permits easy retrieval in snag prone areas. Hot Dipped Galvanized Finish

Super Hooker

"The Super Hooker anchor is a good choice for your anchoring needs. This lightweight, hot dipped galvanized Super Hooker anchor has strong wide flukes that penetrate quickly and firmly for maximum holding power. The fully welded crown configuration provides the right angles for ultimate holding power and secure penetration. The Super Hooker stows flat and can be used with most fluke type anchor storage systems."

Boat Bunks & Guides

Available by special order only.

Pontoon Trailer Guide On's

New!

Bright orange end caps on these PVC guides give you a brighter target when loading your pontoon boat. The guide posts are designed to be mounted between the pontoons. Made of 1-1/2" square, 16-gauge steel tubing and covered by 2"x 20" PVC pipe. Hot dip galvanized guide posts extend fully into the PVC tube for additional strength. Mounts to trailer cross members up to 2" wide by 2" high. All mounting hardware included.

Part #86465

High Impact Pontoon Trailer Guide On's

New!

Ideal for larger pontoon boats. These guides are designed for rough water loading where high impact guides are required. The guide posts are hot dip galvanized for long life with covers made from high impact non-marking molded PVC. The guide posts are designed to be mounted between the pontoons. Made of 2-1/2" square, 13-gauge steel tubing. Mounts to trailer cross members up to 2" wide by 2" high. All mounting hardware included.

Part #86467

Low Rider Guide On's

New!

Ideal for jon boats, bass boats and personal watercraft. The guide posts are hot dip galvanized for long life with covers made from high impact non-marking molded PVC. Low Rider Guide On's give you the extra advantage of high strength and great looks for your trailer. Made of 1-1/2" square, 16-gauge steel tubing and covered with wrap around protective PVC molded covers. Mounts to trailer cross members 2" by 2" and 2"x 3" frames. All mounting hardware included.

Part #86466

Jet Ski Lift

Jet Rail *Jet Rail XL*

The Jet Rail and Jet Rail XL are all galvanized steel PWC lift designed for easy one person "launch and load". The small foot print under the ski allows easy walk around while the watercraft is stored on the dock or seawall. The brake wench and mount adjusts to any size watercraft and slides inside the lift when not in use, saving even more precious dock space. Carpeted bunk boards and all hardware are included. All you add is your PWC!

Jet Rail
Jet Rail XL

Maximum Weight is 650# (Including gas & oil)
Maximum Weight is 950# (Including gas & oil)
